

Meet your smart security sidekick.

Introducing an autonomous security robot that assists and collaborates with security teams around the world. Equipped with a robust video analytics platform and A.I. technology, it can patrol any indoor space, provide custom alerts, stream live video surveillance, and respond automatically.

Feature Overview

Video Analytics

Detects human activities, vehicles, animals, and over 80 objects.

Autonomous Patrol

Personalize your video analysis and areas of interest.

Customized Alerts

Simple setup for notification types and on/off time schedule.

Cloud Storage

Important video clips (events) and continuous footage synced and encrypted in the cloud.

Live Streaming

Free and secure live monitoring by authorized users.

Anytime, Anywhere

Remote access via iOS and Android devices and web browsers.

Mobile P.A. System

Use text-to-talk or voice recording features to communicate via security robot

Audio/Siren Warnings

Deter suspects with an automatic alarm once a specific object or activity has been detected.

Compatible with Video Management Software

Seamless integration with most VMS and DVR platforms.

Device Dimensions and Deployments

The beauty is in the details.

Common Applications

Office	Lobbies Work Spaces Corporate Campuses
Retail	Shopping Centers Food Halls After-Hours Patrol
Industrial	Warehouses Manufacturing Facilities Storage Facilities Distribution Centers
Other	Universities Hospitals Assisted Living Facilities Museums

Specifications

Size	H 26" x L 23" x W 11"
Weight	50 lbs.
Robot Speed	Up to 3 MPH
Ride-on Speed	Up to 10 MPH
Battery Life	6-8 Hours*
Accessories	Auto-Charge Station + Visibility Mast

**It can run 24/7 if charging cycles are split into intervals of 5 minutes each hour.*

AN UNPRECEDENTED COLLABORATION
