

READYSENTRY RDI

RAPID DEPLOYMENT INTELLIGENCE

The Ganz ReadySentry Rapid Deployment RDI is an all-in-one security system housed in a ruggedized mobile unit. The powerful AI video analytics package in the ReadySentry identifies events based on object classification (e.g., vehicle, human) or tracking events (e.g., motion zones) and stores recordings in the Cloud. Users receive alerts and use a Google-like natural language search engine sifting through archived videos to find relevant footage quickly.

This intelligent video feature drastically reduces false alarms, limits data transfer and storage costs, and ties metadata to recordings for fast and accurate forensic video searches.

INDUSTRY APPLICATIONS

- Construction Site Surveillance
- Parking Occupancy
- Outdoor and Public Events
- Virtual Turnstile/People Counting
- Vehicle Trend Analytics

WIRELESS 4G

PLUG AND PLAY

AI ANALYTICS

REMOTE MONITORING

Ganz RDI ReadySentry can be quickly installed and configured to stream and record video. It provides durable, secure, and easy to operate high-resolution wireless IP surveillance for situations requiring a quick response.

FEATURES

CAMERAS & SENSORS

- Ultra-high resolution optics
- SDXC SD Card for continuous/VCS based ring buffer
- IR LEDs (197" range) for NO LIGHT situations
- Wide range of focal lengths available to cover every scene
- GXi Video analytics for application areas including intrusion detection, vehicle monitoring, abandoned-object detection, people counting and loitering detection, as well as camera tampering and failure detection.

WIRELESS COMMUNICATIONS

- Hybrid edge cloud AI computing for the best adaptive bandwidth control (less than 1/10th band throttle)
- Verizon 4G/LTE or Wifi connectivity
- TLS/HTTPS data encryption for transmission and storage (256-bit Advanced Encryption Standard)
- Web-based portal
- Remote reset

HARDWARE

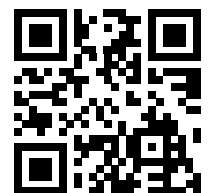

- Outdoor-rated Rapid Deployment Unit
- Custom Camera and power options
- Designed to meet IP66 rating for outdoor use
- High operating temperature
- Quick Plug and Play Installation
- Ongoing intelligence, anywhere

AI ANALYTICS

- Google-style smart search
- Customized query-based video search for real-time alerts
- Firewall friendly with secure live streaming (no inbound network ports required)
- Save 30-90+ days of video in protected cloud storage
- Unlimited Guests - add guests or selectively share via links
- View map of camera locations
- Download your video or share it with your colleagues
- Easy data flow to Google BigQuery delivers a personalized dashboard of statistical data.
- Social distancing, mask detection, crowd control, and parking control custom applications
- The unit is outside, but the data is in the cloud. The evidence is protected.

Model	ZRDI-SENTRY
Power Requirements	120VAC +/- 10%, 50W Max (20W Typical)
Weight	17.4 LBS (7.9kg)
Dimensions (HxWxD)	21.5" x 12.75" x 6.0" (546mm x 324mm x 152mm)
